Edinburgh EH9 3JZ, Scotland, UK

CARSTEN HARTMANN

Institut für Mathematik  
Brandenburgische Technische Universität Cottbus-Senftenberg  
Platz der Deutschen Einheit 1, 03046 Cottbus, Germany

In the article Banisch et al. [1], the acknowledgement was incomplete. The full version reads:

The authors thank Marco Sarich and Christof Schütte for helpful discussions and Antonia Mey and Francesca Vitalini for providing the Alanine dipeptide data. The research was funded by the Deutsche Forschungsgemeinschaft through the Research Center Matheon and the CRC 1114 “Scaling Cascades in Complex Systems” (Project A05).
